

# **HOUSE HUNT APPLICATION**

## **ABSTRACT**

If you are a stranger in some city and want to rent house than it is difficult to find suitable house in time. Housing sector remains vigilant to face the challenges of change, by employing a new strategy that facilitates easy management of rental houses. Hence there is need to develop a rental house management system that can simplify work for the rental managers so that all their work can be efficient and effective. Considering those facts, we decided to develop a rental house management system that can solve all the problems experienced with the current manual system. The application is developed in such manner that it provides maximum user friendly interface. This is the main motivation behind House Hunt - Android Application to buy Home on rent project .
